# COORDINATION CHEMISTRY REVIEWS, VOL. 79 (1987)

## AUTHOR INDEX

Albers, M.O., 1

Bailey, C.L., 321
Basolo, F., 279

Carlin, R.L., 215
Chen, Y.-T., 257
Clark, H.C., 229

Drago, R.S., 321

Goodgame, M., 97

Haight, Jr., G.P., 293
Hampden-Smith, M.J., 229

Jakubovic, D.A., 97

Kershner, D.L., 279

Robinson, D.J., 1

Singleton, E., 1

Walther, D., 135
Wilkins, P.C., 195
Wilkins, R.G., 195
Williams, R.J.P., 175

## SUBJECT INDEX

Binuclear iron site in hemerythrin, the coordination chemistry of the, 195
Bio-inorganic chemistry, missing information in, 175

Carbon dioxide, homogeneous-catalytic reactions with unsaturated substrates, 135
Cobalt(II) catalysts, utilization of $O_2$ for the specific oxidation of organic substrates with, 321
Crowded molecules, ligand interactions in, 229
Cyclopentadienyl and related penta hapto dienyl ligands, ruthenium and osmium complexes containing, 1

Hemerythrin, the coordination chemistry of the binuclear iron site in, 195

Linear thermodynamic function relationships in coordination chemistry, 257

Magnetochemistry: a research proposal, 215
Metal carbonyls, $\eta^5$-heterocyclic, 279
Metal ions, role of in the hydrolysis of phosphate esters and anhydrides, 293

Organic substrates with cobalt(II) catalysts, utilization of $O_2$ for the specific oxidation of, 321
Osmium and ruthenium complexes containing cyclopentadienyl and related penta hapto dienyl ligands, 1

Phosphate esters and anhydrides, role of metal ions in the hydrolysis of, 293

Reversible $CO_2$-carrier reactions of carbon dioxide, 135

Specific oxidation of organic substrates with cobalt (II) catalysts, utilization of $O_2$ for the, 321

Transcarboxylation reactions of carbon dioxide, 135

Uracils, metal complexes of, 97
